

Community Air Protection Program Survey

The Antelope Valley AQMD values community input as an important part of the Community Air Protection (CAP) Program. Community feedback helps the District better understand local air quality concerns and identify opportunities that may improve air quality and public health.

Community input is considered together with applicable California Air Resources Board (CARB) funding guidelines, project eligibility requirements, and available funding when evaluating projects for funding consideration. Community ideas help identify local air quality needs. Proposed projects must also meet applicable CARB funding guidelines before they can be considered for funding.

More information about AVAQMD's Community Engagement and Protection Program can be found at www.AVAQMD.ca.gov

Background

What sector listed below best represents you? (select one)

- Individual
- Organization/Industry/Business
Organization or business name: _____

How many members or employees are represented by the organization or business? _____

- Other: _____

Name (optional) _____

Your community Zip Code (required): _____ City: _____

Have you previously participated in an AVAQMD meeting or survey?

- Yes
- No

Current Programs & Project Types

The following project categories are currently eligible for funding through one or more AVAQMD-administered incentive programs. Eligible project categories may change as CARB updates program guidelines.

- On-road vehicles (Zero-emission options)
- Off-road equipment (may be limited to zero-emission options)
- Stationary equipment
- EV Charging and alternative fueling infrastructure
- Zero-emission lawn & garden equipment replacements
- Zero-emission school transportation (public schools & transit only)
- Deployment of Air Monitoring Systems

Which of these concerns has the greatest impact on your community? (Select up to three.)

- Heavy-duty diesel trucks
- Passenger vehicle emissions
- Construction equipment
- Agricultural equipment
- Lawn and garden equipment
- Dust from roads or construction
- Industrial or commercial emissions
- School-related air quality

Where do you experience these concerns throughout the Antelope Valley?

- Near your home
- Near your school
- Near your workplace
- Along a roadway
- Industrial area
- Agricultural area
- Other

Please describe your concern:

Final Comments

Are you aware of a business, school, public agency, nonprofit organization, or other entity that may be interested in reducing emissions through an AVAQMD incentive program? If yes, please provide any information you have below.

Is there a business, school, local agency, nonprofit organization, or community organization that may be interested in participating?

Please identify any area in your community where there is a lot of activity from the equipment types identified in this survey.

Do you have any ideas that may improve air quality in your community?

Are you aware of a project that may qualify for an AVAQMD incentive program?

Are there any other sources of air pollution that concern you or impact your community, such as fugitive dust, smoke, etc. If so, please Explain.

Can we contact you if we have any follow-up questions? Yes No

If yes, please provide email address: _____

Thank you for your participation. Community input helps AVAQMD better understand local air quality concerns and identify opportunities that may be addressed through eligible projects and available funding programs. While every idea cannot always be funded, your feedback is an important part of the District's ongoing community engagement efforts.
